EXTREME PROTEIN GUIDE

Protein helps maintain muscles and repair tissues and cells. Not having sufficient protein in your diet can leave you feeling weak and tired.

Both meals in a typical day on the Tony Ferguson Extreme plan include a protein serve. Use the guide below to help you choose your protein for these meals.

Unless indicated, all serves are palm-sized meaning the size and thickness of your own palm not including your fingers. The average weight of a serve is 220g for males and 120g for females.

- **Red meat** – Beef, Lamb, Veal
- **Pork**
- **Poultry** – Chicken, Turkey
- **Fresh fish**
- **Tinned salmon or tuna** – Packed in water or brine
- **Sliced meat** – ham, turkey – only enough slices to fit in the palm of your hand**
- **Seafood*** – Prawns and Oysters (Females: 1 cup, Males: 1½ cups), Crab (Females: 1½ cups, Males: 2 cups)
- **Eggs (Large)** – Females: 2 Eggs, Males: 2 Eggs + ½ another listed protein serve
- **Cottage cheese** – Females: 150g, Males: 200g
- **Ricotta** fresh or smooth packaged – Females: 150g, Males: 200g
- **Firm Tofu** – Females: 150g, Males: 250g
- **Soy sausages** – Females: 2 sausages, Males: 3 sausages

*Consume no more than 3 or 4 times per week (all options inclusive), i.e. have no more than a total of six eggs per week.

**Try to limit processed meat consumption, fresh meats are a better choice.

If you are vegetarian, you can choose suitable alternatives from our list of [vegetarian protein options](#).
